Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: a subject is presented with a stimulus (a word or image), then a response is recorded (e.g., 'yes' or 'no'), and finally, the subject is asked to provide a justification for their response. The justification is then recorded and used for analysis.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated with the plant explants for 24 h. The explants were then cultured on the selective medium. The number of explants transformed was counted. The results are the mean $\pm$ SD of three independent experiments.
